Food Donation Website

Problem Statement Description:

Wasting food is a common problem in our society. Food waste is crucial since it can improve our environmental and economic sustainability. We have identified the use of web technology to reduce food waste and built an web application that allows restaurants and people to donate and share their leftovers food with people who are in need. This website will enable users to register, login, view items, add items, add items to cart, remove an item from the cart, and log out. This website is using the sql storage and real-time database. Any user in need can see all the food images donated by different users and add it to his or her cart.
